

Sustainability Policy

As a prominent Independent Power Producer (IPP) in India, Hinduja Renewables Energy Pvt Ltd, (HREPL) aims to become a global benchmark for excellence in renewable energy eco system. We believe sustainability goes beyond operational necessity—it stands as a moral responsibility. Our approach inspires us to return more to the planet than we consume, securing a legacy of restoration and environmental stability.

This policy applies to all functions across our corporate offices, project sites under construction, and active operational assets. We are committed to continually improving our environmental, social, and economic management frameworks to deliver value to our stakeholders.

Our Guiding Principles

- We embed sustainability across every business function to reduce climate risks and proactively safeguard air, water, soil, and biodiversity.
- We strive to achieve a net-zero carbon footprint by enhancing energy efficiency and adopting 100% renewable power across our entire operations.
- We are committed to lowering water dependency and executing robust measures to achieve and maintain a “Water Neutral” outcome.
- We emphasize the “Reduce, Reuse, and Recycle” framework to optimise material usage, working toward “Zero Waste to Landfill” across all locations.
- The wellbeing, safety, and respectful treatment of our people are essential. We follow a “Zero Tolerance” approach to workplace discrimination and safety violations.
- We uphold rigorous standards of honesty and compliance, exceeding applicable legal and regulatory expectations to set benchmarks in ethical governance.
- We work to build shared value, collaborating with local and global communities to enable inclusive, responsible, and sustainable growth.
